

I GOT MY COVID-19 VACCINE!

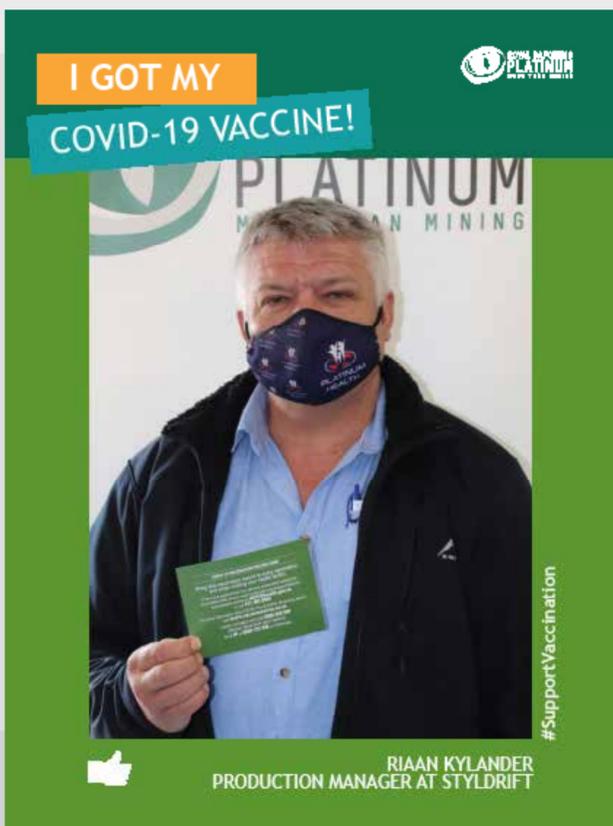

‘It was great taking the vaccine and I feel like I have already conquered the pandemic. I thought it would be painful but I only had a slight headache after getting the jab. The RBPlat vaccine site is world class, however we just need to improve on the registration process, as it is quite long.’

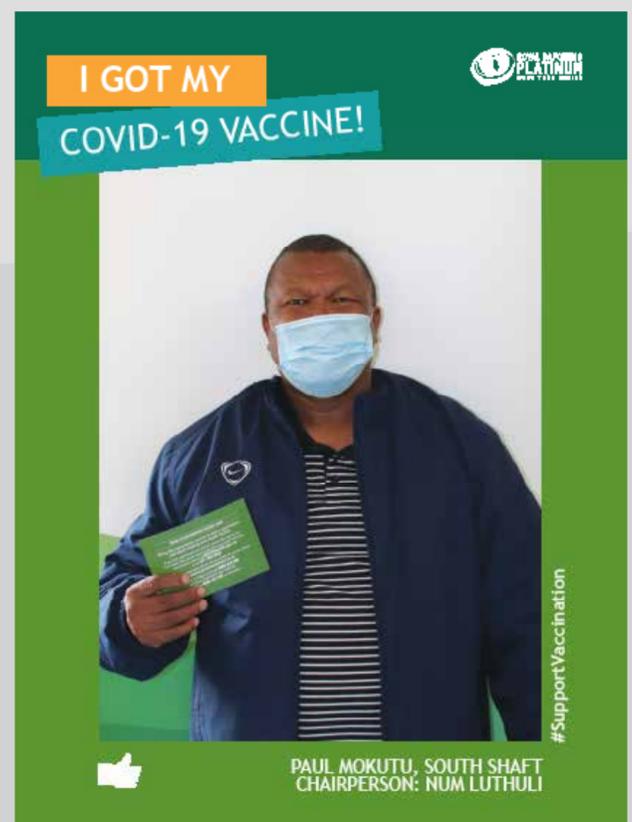

‘I had a pleasant vaccination experience; the injection was not painful and I do not have any side effects thus far. It is imperative for all of us to get vaccinated, so that we remain healthy and alive, for the sake our future generations and to achieve our dreams.’

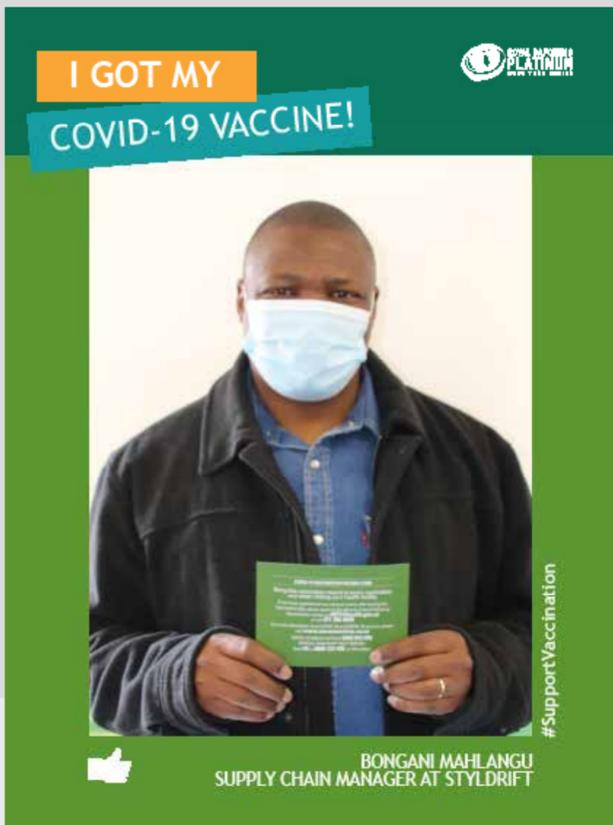

‘I felt a little bit anxious before my vaccine, because I didn’t know what to expect. I did not even feel it. I just saw the nurse throwing away the injection and confirmed that it was done. The whole process was professional and respectful.’

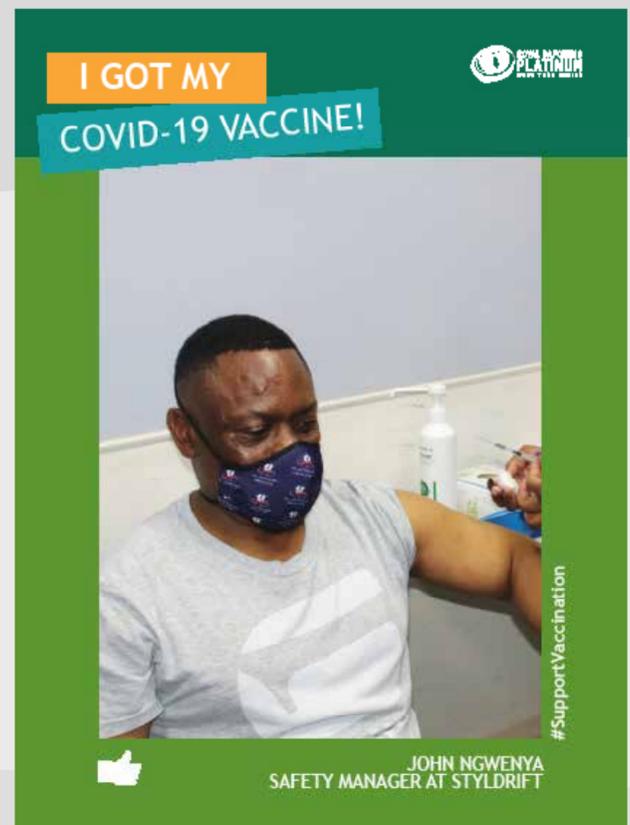

‘On the day of the vaccination, I was nervous, doubtful and fearful because of the myths going around. The nursing staff helped to alleviate my fears and explained the entire process including any possible side effects of the vaccine. I felt very excited after receiving the jab; it was quick and had no side effects aside from a painful arm from the injection. I look forward to my next jab in 42 days.’

I GOT MY COVID-19 VACCINE!

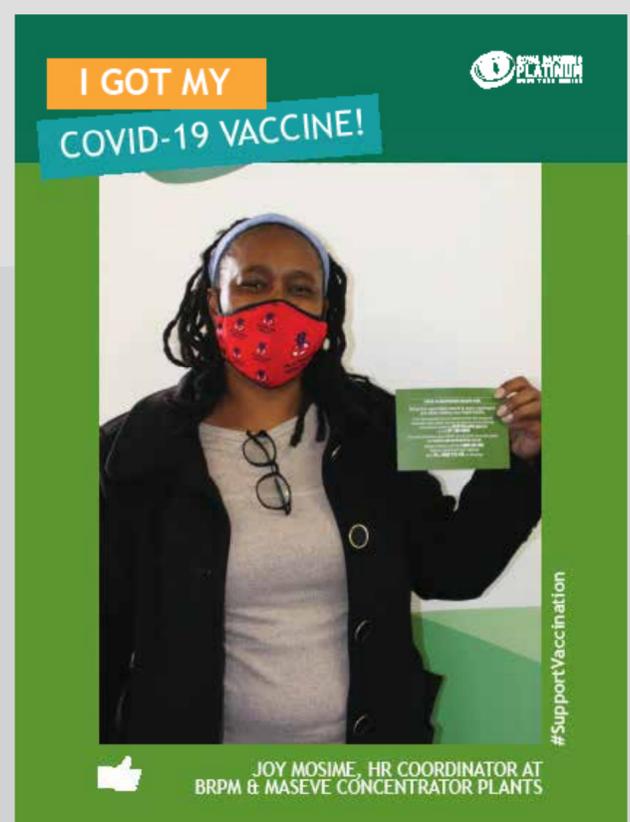

'My vaccination experience was exciting. I feel proud that our company is investing great efforts to save lives. The vaccination site looks good and is well organised and I encourage everyone to use this opportunity to vaccinate.'

'The opening of the RBPlat vaccination site is a great step for the company and really lives its values of safety, care, proactive leadership and people first. As leaders in our families, organisations, and communities, let us set the example and get vaccinated. It is the right thing to do for the sake of everyone in our beloved country.'

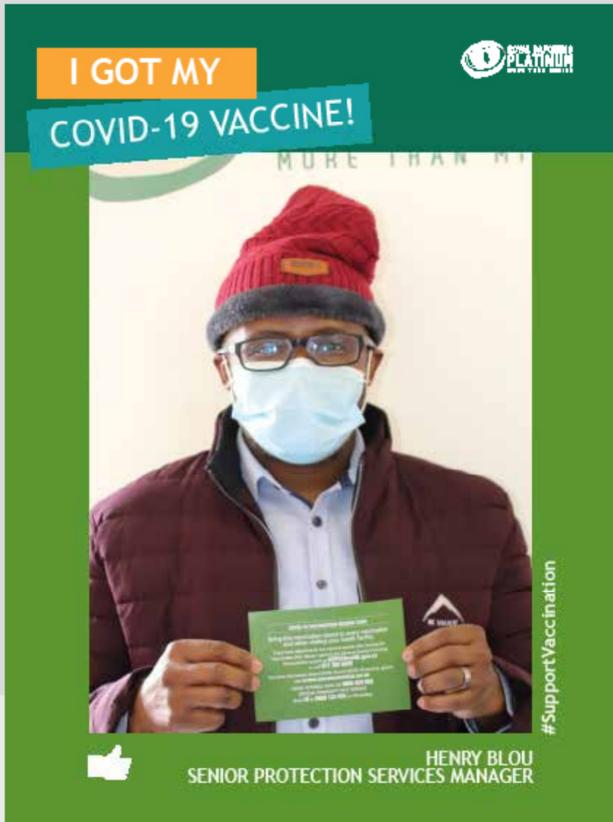

'It is our ability to respond and adapt to inevitable changing environments that will see us through any storm. COVID-19 is real, and to preserve my own life and the livelihood of my loved ones, I choose to vaccinate, as it is the responsible response to this storm!'

'I am happy that I got vaccinated today! The vaccination was okay, as I did not experience any pain or side effects. I encourage everybody to get vaccinated, to minimize the risk and impact of infection. It is understandable that some people may be fearful, but I can attest that there is nothing to fear and it can be done.'

I GOT MY COVID-19 VACCINE!

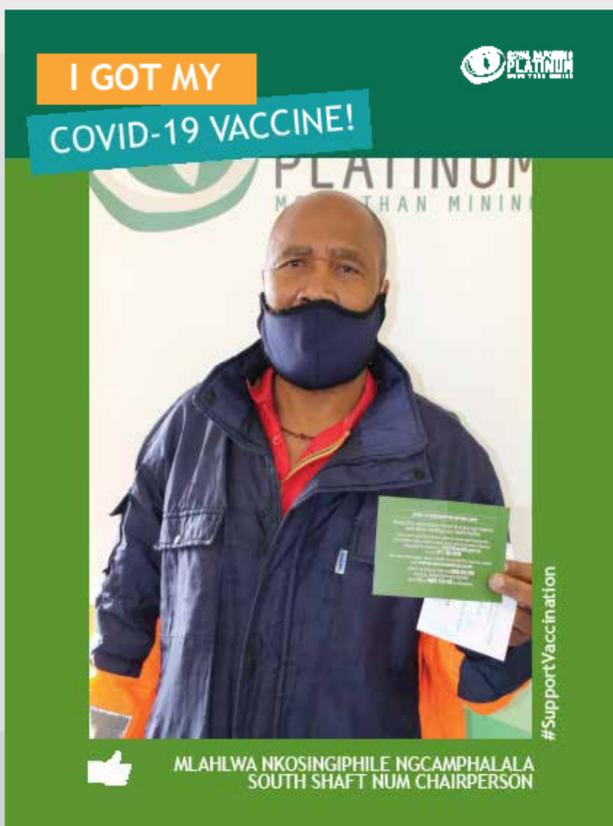

'I feel good to have reached this milestone today. I know that the vaccine is our lifesaver as it gives us a fighting chance, even we contract COVID-19. Even if you are vaccinated, you should not lower your guard and continue to practice all the COVID-19 safety protocols. I appeal to everyone to get vaccinated; our site is professional and nurses are friendly and there is a good flow of the vaccination process from start to end.'

'My vaccination experience at our very own vaccination site was pleasant, with professional and excellent service from the staff. I am looking forward to my next dose in 42 days. I can assure everyone that the people I know, who have already been vaccinated are all fine. I encourage everyone to get vaccinated, as we need overcome this pandemic and reach a state of normality.'

'I received my COVID-19 vaccine on the 16 July 2021. After the vaccination, I felt dizzy and had a mild headache and a painful arm. During the 15 minutes of observation, we received an after-care pack, as well as detailed information on the post symptoms of the vaccination.'

'I did not experience any pain or side effects from the vaccine. We were allowed 15 minutes in observation, after receiving the jab and the aftercare guidelines were quite detailed. Some people might experience post vaccine symptoms because our immune systems will obviously react differently. However, I encourage everyone to come and get vaccinated as there is medical and professional help available, to assist with any symptoms encountered during and after the vaccination process.'
